

MY AWAKENING

The world's most innovative 80-Metre ECO Yacht
by EDVIN H DESIGN

Introduction

MY Awakening is a groundbreaking ECO yacht designed to revolutionize the aesthetics of luxury ECO vessels. Its exterior boasts automotive-inspired features, with complex surfaces seamlessly integrating advanced technology and industrial design solutions.

Solar and Energy

Innovative solar panels, cleverly concealed as retractable awnings, whirlpool features on the sun deck, and in supporting pillars, contribute to sustainable energy use. Additionally, the aft swim platform includes a mechanical system capable of harnessing wave energy from the ocean.

Lower Deck

For adventure-loving owners, the lower deck offers boundless opportunities for physical activity. It houses a variety of toys, including electric mountain bikes, single-person solar-electric tenders, and water scooters. The solar-electric tenders can effortlessly enter the yacht via intelligent side-hatches designed to stabilize movement during docking. These hatches also feature a retractable swim-in platform, simplifying re-entry after a swim.

Main Deck

Gourmet enthusiasts will appreciate the integrated teppanyaki kitchen, powered by solar energy stored in the awnings. This space is adorned with luxurious materials such as glass-laminated copper, natural stone, and stainless steel.

Owners Deck

Yachting merges work and play on the Owners Deck Aft. Here, a semi-enclosed workspace features a natural stone table with built-in tablets, powered by discreet solar panels in the deck pillars.

Foredeck

The foredeck, dubbed "Solar-City," is a hidden relaxation area that transforms from a solar panel array. The energy harnessed powers the entertainment system, including a deck-integrated projector and TV screen.

Sun Deck

The sun deck is a fully integrated wellness area featuring four solar-powered baths and whirlpools. Accessed via a central interior staircase, this deck includes a central sauna, providing an ultimate relaxation experience.
